DETAILED ACTION

Reason for allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-8, the prior arts fail to teach or fairly suggest an aggregate link process that comprises a step of coordinating member devices of the link aggregation by repeating packets of predetermined packet type at the end device including receiving a packet from an originating link aggregation member via a network link and repeating the packet by sending the packet back to the originating link aggregation member and/or to the other link aggregation member devices, in combination with other limitations, as specified in the independent claim 1.

Regarding claims 9-16, the prior arts fail to teach or fairly suggest a process for an aggregate link process, the process comprises a step of coordinating member devices of the link aggregation by selectively repeating a packet transmission received at one of the connected devices from one link aggregation member device to the other link aggregation devices to provide coordinating information, in combination with other limitations, as specified in the independent claim 9.

Regarding claims 17-20, the prior arts fail to teach or fairly suggest a aggregate link system that comprises a coordinating means for coordinating the link aggregation member devices, the coordinating means for determining at a connected device a packet type received from the link aggregation and if the packet is one of predetermined packet types either sending the packet back to the originating link aggregation member device or to the other link aggregation member devices, in combination with other limitations, as specified in the independent claim 17.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
